

Read me

Instructions to open my source code and Run:

1. I implemented both parts of the Assignment2 in the Visual Studio 2019. To open and run my program, Visual Studio 2017 or 2019 should be installed on your system.
2. To see my source code, you should unzip the folder named "Source Code". There are three folders inside it:
 1. The folder named Part1 contains the source code for the part1 of the assignment. Open this folder and double click on Assignment2.sln file so that you will be able to see the source code and run it.
 2. the folder named Alice contains the source code for Alice party. To see and run the code, you should double click on Alice.sln.
 3. the folder named Bob contains the source code for Bob party. To see and run the code, you should double click on Bob.sln.

It is worth mentioning, for transferring data between Alice and Bob, you should run both of them and then follow the applications for transferring data between them.
